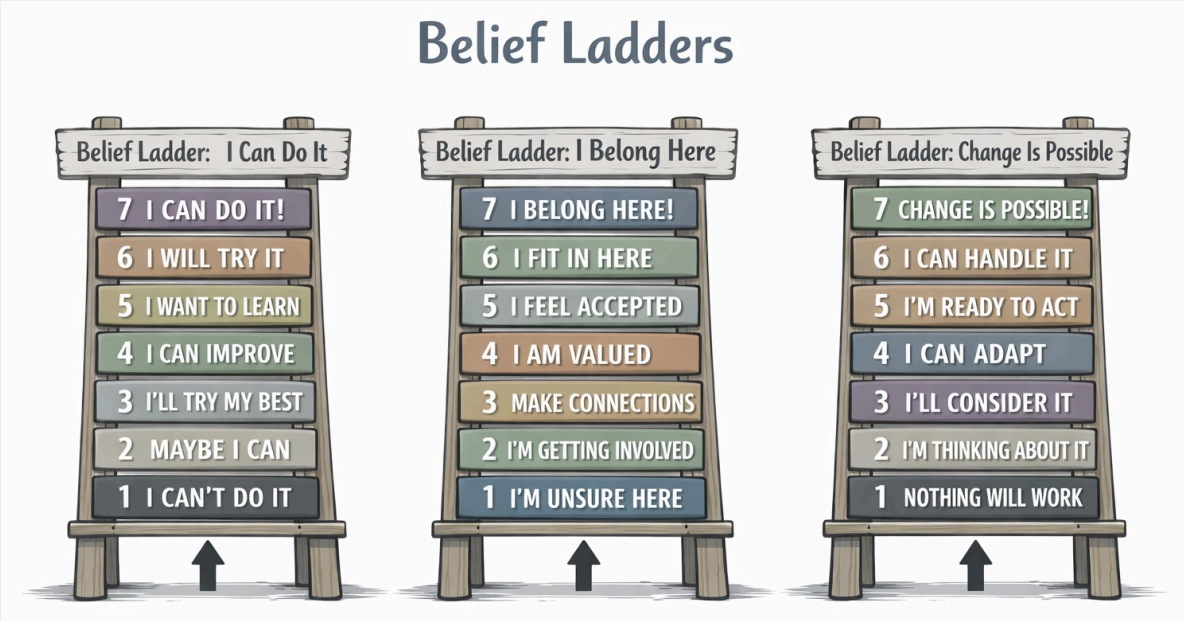
LESSON 11 · IMPACT-OLOGY

The Belief Ladder

You never go further than you believe you can.



WHAT YOU NEED TO KNOW

- Belief means seeing something as real **before** it's actually happened yet.
- You will never outperform what you believe is possible for you.
- The Belief Ladder helps you climb from a limiting belief to an empowering one, one small step at a time.
- Your beliefs come from how you judge a situation - re-evaluate it, and your belief can change too.
- Success isn't about being smarter. It's the habit of doing things other people avoid doing.
- Wishing isn't enough - you have to truly believe you can have something before you're ready to get it.
- PRAXIS: the practical application, exercise, or putting into action of a theory, lesson, skill, or idea, as opposed to theoretical knowledge

> *Wallace D. Wattles: 'No matter how tremendous an obstruction may appear at a distance, you will find that if you go on in the Certain Way it will disappear as you approach it, or that a way over, through, or around it will appear.'*
