

Mastermind & Quantum Leaps

Sometimes the breakthrough is a leap, not a step.

◆ WHAT YOU NEED TO KNOW ◆

- ◆ A fly keeps banging against a closed window, when an open door is just a few feet away — sometimes we do the same thing, working harder instead of working differently.
- ◆ Growth doesn't always happen one small step at a time. Sometimes it happens in a sudden leap.
- ◆ A MasterMind is a small group of people working together toward their big, bold goals and dreams. It is a safe place you build together, not alone.
- ◆ A MasterMind can trigger Quantum Leaps.
- ◆ Members of a mastermind can be experts where you have no expertise.
- ◆ Mentors need mentors.
- ◆ Aiming high doesn't actually take more effort than aiming low — so go for your big, bold, beautiful goals and dreams.
