

Review & IMPACT-ology

Look how far you've come. Then keep going.

◆ WHAT YOU NEED TO KNOW ◆

- ◆ Compare who you are right now with who you were on **Lesson 1**.
- ◆ Look at your ripples — the ways your growth has already reached other people.
- ◆ Real education isn't just filling your head with facts. It's actually behaving differently than you did before.
- ◆ Trying to change everything overnight usually changes nothing — be fair and gentle to yourself, and keep going a bit at a time. Tiny baby steps forward are OK.
- ◆ The Universe moves when you move.
- ◆ 'Dis-satisfaction: it's a good thing.'
- ◆ The world progresses when people collaborate: a mastermind is one, a worthy project with a common purpose is another.
- ◆ Your impact is greater when you become **in alignment with** and more aware of who you really are.
- ◆ In an ideal world, we all find our purpose, live up to it and spread our happiness far and wide. **This is IMPACT-ology.**
