♦ WHAT YOU NEED TO KNOW ♦

- ♦ Your conscious mind works through six mental faculties: **Imagination, Will, Perception, Intuition, Reason, and Memory.**
- ♦ These faculties are tools for thinking, deciding, and creating — not just for remembering facts.
- ♦ Schools mostly train Reason and Memory, but Imagination and Intuition are just as powerful.
- ♦ Being “educated” doesn't mean knowing a lot of facts. It means training your mind so well you can get almost anything you truly want.
- ♦ The stronger you build these six faculties, the more control you have over your own paradigm.
